C. Please describe (in 200 words or less) your reasons for seeking a position on the Yakima City Council, and why you believe you can represent the citizens of Yakima as a Council member.

As a Council member, I will promote forward / broad-thinking strategies. As a resident for 35 years, I have had societal concerns towards a well developed vision. It includes business; Port of Yakima and Economic growth that includes ecology, sustainable energy, spending costs, increased safety and public / rail transportation, to and from other Cities to increase revenue, by building architecture infrastructure concepts for a well-planned tourist destination. For any City to do well, businesses must thrive. Interactions increase revenue-flow because of high demand for quality products. To attract & keep young, middle, older citizens in Yakima, we need to focus on the larger view of art, conference halls, architecture, entertainment, clubs, job growth, dining, sports, and indigent people care. Create policies for agricultural bio-diesel products, include a well designed tourist trolley system. Redefine the railway customer travel system to and from Yakima. Thirty-five years ago, my family boarded the train in Seattle for Yakima. We rode in the vista-dome section – we fell in love with the snow, forests, land, cattle and rail-road depot. Fine-tune a friendly customer-oriented security service that draws customers. Existing areas that use these refined security groups for marketing, infrastructure, transportation and architectural building concepts in cities like Seattle Las Vegas, Hollywood, New York, New Orleans and Honolulu.
